

SIRIUS-ES GROUP MISSION STATEMENT

OUR PURPOSE

We are an innovative and forward-thinking partner in energy supply and the energy transition—particularly in the fields of deep drilling and horizontal directional drilling (HDD). As pioneers in the geothermal market with a focus on drilling fluids, we combine technological excellence with years of experience to create sustainable solutions for a secure energy future.

OUR VISION

We aim to be Europe's leading and indispensable contact for drilling projects. Our goal is continuous and stable growth to open up new markets and actively shape innovative drilling systems.

OUR MISSION

We build trust through safety. With technically excellent, reliable, and innovative drilling fluid solutions, state-of-the-art equipment, and comprehensive engineering expertise, we provide real added value for our customers. We act efficiently, solution-oriented, and are always ready for action. Safety at the drilling site and for all parties involved is always our top priority.

OUR IDENTITY

We think from our customers' perspective—their needs and goals are our benchmark. Through agility, rapid decision-making, and cooperative collaboration, we build lasting relationships. We stay close, communicate at eye level, and provide comprehensive on-site support.

OUR VALUES

Our actions are guided by:

- **Trust & Reliability:** We stand for clear processes, transparent communication, and long-term relationships.
- **Innovation & Consistency:** We combine pioneering spirit with proven expertise to develop future-proof solutions.
- **Quality & Competence:** We deliver the highest technical standards and promote the continuous development of our employees
- **Responsibility & Sustainability:** We take responsibility—for the environment, society, quality, and the safety of our actions.
- **Humanity & Respect:** We foster an open, friendly corporate culture that encourages diversity, growth, and mutual appreciation.

OUR TARGET GROUPS

Depending on their field of activity, our customers include energy companies, drilling contractors, and planners in the fields of deep drilling, shallow drilling, and horizontal directional drilling (HDD). We rely on trust, expertise, and genuine partnership to jointly shape the energy future.
